^b The Offeror should enter the Fixed Monthly Charge, as computed in Schedule 1 (see B.7.2). Additions to the Fixed Monthly Charge and new capital upgrades will be handled in accordance with Section H.11, *Accounting for Capital Upgrades/Purchase Price*, FAR 52.243-1 Alt 1, *Changes – Fixed Price*, and Schedules 3-4, but should not be included in the price offered for Sub-CLIN AA or Sub-CLIN AE.

^c The Offeror should enter the Fixed Monthly Charge, as computed in Schedule 5 (see B.7.6) for Government retained infrastructure.

NOTE:
The Purchase Price, Recoverable Portion of the Purchase Price, interest rate and amortization period are proposed by the Offeror. Also note that although the FAR Part 31 cost principles may not apply for the first two-year fixed period of any resultant contract, the cost principles will apply during the redetermination phases of a resultant contract.

5. Add Section B.5.5 Sub-CLIN AA: Applicable Tariff(s) (Government Retained Infrastructure)

B.5.5 Sub-CLIN AA: Applicable Tariff(s) (Government Retained Infrastructure)

Offerors proposing tariff offers shall include a comprehensive description of the tariff in their price proposal. The Offeror shall propose a tariff rate or rates no less favorable than that offered to similarly situated utility customers. The Offeror shall provide an explanation of the tariff, identify the buildings to which it applies, and identify any assumptions regarding service quantity and quality. The Offeror shall describe how the offered tariff rate differs from the rate under which the Installation is currently receiving service and the economic impact of any proposed change. The Offeror shall also describe the regulatory process, if any, which will govern future rate changes (see L.7, *Proposal Preparation Instructions - Volume IV: Price Proposal*). The total monthly price will be the sum of the amount due under the Applicable Tariff(s), the recoverable portion of the purchase price as defined below and listed in the price proposal, and capital upgrades/connection charges, as defined below and listed in the price proposal.

6. Delete Section B.6.5 Economic Price Adjustment Index Methodology and replace with the following:

B.6.5 Sub-CLIN AE: Fixed Monthly Charge (Government Retained Infrastructure)

The Fixed Monthly Charge consists of two components, operations and maintenance and renewals and replacements (Schedules 5-6)(see B.7.6 and B.7.7) for Government retained infrastructure.

Note for Schedule B-4 Offers: Prices proposed for Sub-CLIN AE identified in Schedules 5-6 shall be based on expected price levels during the first two years of operation. The effect of price inflation on costs incurred in years subsequent to the first 2 years of operation will be considered as part of the price redetermination process defined in Section I.6, *Type of Contract – Price Redetermination—Prospective*.

7. Add Section B.6.6 Economic Price Adjustment Index Methodology:

B.6.6 Economic Price Adjustment Index Methodology

In their Price Proposals, offerors should specify the index or indices they propose as a price adjustment mechanism. Offerors should explain why the indexes proposed were selected, comprehensively describe the working of the price adjustment mechanism including the timing of adjustments and the composition of the base, and provide a sample calculation.

8. Delete current Section B.7.1 General and replace with the following:

B.7.1 General

Please note that Schedules 1 and 2 (see B.7.2 and B.7.3) **and 5 and 6 (see B.7.2 and B.7.3)** are not necessary for offerors proposing a B.4.1 Tariff Proposal. All other offerors must provide the following:

B.7.6 Schedule 5 – Fixed Monthly Charge (Government Retained Infrastructure)

Component	Monthly Charge
1. Operations and Maintenance (O&M)

9. Add Section C.2.1.1 Utility System Conveyance and Acquisition of Utility Services:

C.2.1.1 Utility System Conveyance and Acquisition of Utility Services

The Government is conveying the utility systems identified in this solicitation. Concurrent with the conveyance of the utility system the Government will acquire electric distribution service to replace the service currently provided by the Government. The Government is requesting proposals for the purchase of the utility systems listed in Section B.3, the conveyance of the infrastructure and the acquisition of the identified utility services. The conveyance of the utility system and the acquisition of utility services are both subject to the terms and conditions of this solicitation. The Contractor shall furnish all necessary labor, management, supervision, permits, equipment, supplies, materials, transportation, and any other incidental services required for the complete ownership, operation, maintenance, repair, upgrade, and improvement of these utility systems. The Contractor will provide these services in accordance with all terms, conditions, and special contract requirements, specifications, attachments, and drawings contained in this solicitation or incorporated by reference.

10. Add Section C.2.12 Acquisition of Utility Services for Government Retained Infrastructure:

C.2.1.2 Acquisition of Utility Services for Government Retained Infrastructure

The Government is retaining portions of the utility systems identified in this solicitation. Concurrent with the conveyance of the utility system the Government

will acquire electric distribution service to replace the service currently provided by the Government. The Government is requesting proposals for the identified utility services. The utility services are subject to the terms and conditions of this solicitation. The Contractor shall furnish all necessary labor, management, supervision, permits, equipment, supplies, materials, transportation, and any other incidental services required for the complete operation, maintenance, repair, upgrade, and improvement of these utility systems. The Contractor will provide these services in accordance with all terms, conditions, and special contract requirements, specifications, attachments, and drawings contained in this solicitation or incorporated by reference.

11.Delete current Section C.3.5 Energy/Water Commodity Supply and replace with the following:

C.3.5 Energy/Water Commodity Supply

Electric commodity supply is not included in this Solicitation. The Government retains the right to procure or supply electricity that will be transported on the system covered by this contract from any lawful source. However, offerors may submit an alternative proposal that include supply of commodities (See L.6.2). Such offers will be considered on a case-by-case basis. The Government will retain ownership of all commodities transported and distributed through the Contractor-owned systems unless otherwise provided in the contract.

12.Delete current Section J1.2.1.1.1 Main Cantonment Substation and replace with the following:

J1.2.1.1.1 Main Cantonment Substation

The Main Cantonment Substation is located at the intersection of Hood Road and Tank Destroyer Boulevard. Fort Hood has programmed replacement and removal of this substation within the next 5 years. Construction on a new substation has begun, however, the new substation will not be completed by the time of award. Four Texas Utilities (TXU-Oncor)-owned transformers in the substation transform the energy to the Fort Hood 12.47-kV 3-phase 4-wire distribution system. On the secondary of each of the four transformers is a totalizing breaker, which feeds the station bus. The station is an open-air insulated design utilizing a main and transfer

bus configuration. Sixteen feeder breakers supply the feeders, which emanate from the substation. The point of demarcation between the TXU-Oncor and Fort Hood systems is the line side bushing connections of the totalizing breaker located between the TXU-Oncor-owned transformers and the Fort Hood main and transfer bus.

13. Add the following text to Section J1.2.1.1.2 West Fort Hood Substation:

Fort Hood is negotiating the purchase of the two TXU-Oncor-owned transformers, associated ancillary equipment, and associated infrastructure as an energy saving project. By purchasing the transformers, Fort Hood is pursuing the ability to purchase power as a wholesale customer, reducing the installation's energy bill. If Fort Hood is successful with this project, the Contractor shall be required to maintain and operate the transformers associated ancillary equipment, and associated infrastructure. The Contractor shall be required to enter into negotiations in good faith for the purchase of the two transformers from Fort Hood contingent upon Fort Hood's purchase of the transformers.

14. Section J1.2.1.1.5 Terminal VHF Omnidirectional Range (TVOR) is incorrectly numbered and should be replaced with: Section J1.2.1.1.4 Terminal VHF Omnidirectional Range (TVOR).

15. Section J1.2.1.1.6 BLORA is incorrectly numbered and should be replaced with: Section J1.2.1.1.5 BLORA.

16. Add Section J1.2.1.1.6 Transmitter Station

J1.2.1.1.6 Transmitter Station

The Transmitter Station is a single facility located north and west of the Main Cantonment, along Antelope Road. This is a single building which receives power

from a short section of primary overhead distribution circuit served by Hamilton CO-OP. The point of demarcation for the Transmitter Station is the load side of the meter and associated equipment on the meter pole located just inside the post perimeter. The meter and associated equipment for the Transmitter Station is owned and maintained by Hamilton CO-OP.

17.Delete paragraph 4, Section J1.2.1.3 Inventory, and replace with the following paragraph:

The electric distribution system on Fort Hood also includes substations and a switching station. **Tables 2D, 2E and 2F** identify the major components in Main Cantonment, West Fort Hood, and North Fort Hood substations, respectively. A more detailed list of substation components can be found in the Bidders Library. Based on real property records, the estimated age of the Main Cantonment, West Fort Hood, and North Fort Hood substations are 1965, 1985, and 1986 respectively. While the Main Cantonment substation was constructed in 1965, all of the 15 kV oil circuit breakers and isolating switches were replaced in 2002.

18.Delete current Section J1.3.1 Government-retained Utilities Infrastructure and replace with the following:

J1.3.1 Government-retained Utilities Infrastructure

Several new family housing projects are currently under construction or will have begun construction by the time this contract is awarded. The FHFH Partnership, may install additional utilities infrastructure from the existing Fort Hood utility systems to the points of demarcation of these newly constructed housing units (see **Paragraph J1.2.1.2, Table 1B**). The Contractor shall negotiate in good faith with the Contracting Officer to add the maintenance and renewals and replacements of the yet undefined infrastructure associated with all future FHFH housing units to the scope of *Fixed Inventory, Government Retained Infrastructure*, as required by this Contract, at the time the new infrastructure is defined and prior to connection of this infrastructure to the Contractor's system.

The Contractor shall separately cost services for the infrastructure to be retained by the Government under CLIN AE, *Fixed Monthly Charge for Government Retained Infrastructure*, see Paragraph B.5.5 (Offerors proposing a Tariff under Schedule B-

1) or B.6.5 (Offerors proposing under Schedules B-2, B-3 or B-4), and Paragraph C.2.1, *General*.

19. Add the following paragraph to Section J1.7 Energy Saving Projects:

Fort Hood is negotiating to purchase the two TXU-Oncor- owned transformers at the West Fort Hood Substation. The purchase of the transformers will lower the installation's energy costs. The Contractor shall be required to support the Government's implementation of this project as appropriate.

20. Delete current Section J1.8 Service Area and replace with the following:

J1.8 Service Area

IAW Paragraph C.4, Service Area, the service area is defined as all areas within the Fort Hood boundaries and include the Main Cantonment Area, West Fort Hood, North Fort Hood, the Ranges, and BLORA. The North Fort Hood area is serviced by a separate distribution system from the Main Cantonment and West Fort Hood areas, but can back feed portions of the Main Cantonment and vice versa. The BLORA and TVOR tower are serviced by separate distribution systems and do not tie into the three substations on Fort Hood.

B. All other Terms and Conditions shall remain unchanged and in full force and effect.
